

SECTION 1: HEADLINE

Eyebrow

The AI-native operating platform for maritime

Headline

Make ship-shore operations connected, measurable, and AI-ready

Subheadline

FrontM is the new digital layer for maritime, where fleet operators, maritime companies, and industry partners come together to modernise operations, launch AI-powered services, and scale digital transformation across ships and shore.

CTAs

Explore the Platform

Build on frontm.ai

SECTION 2: PROBLEM

The maritime operating gap

Inefficient operations and fragmented tools are holding maritime back.

Too many channels: Critical information gets scattered.

Too much manual work: Teams chase instead of progress.

Too little visibility: Issues escalate out of sight.

Too slow to change: Digitalisation gets stuck in silos.

Too much human risk: Fatigue and safety risk compound.

Avoidable operational friction can cost over \$52K per ship per year.

SECTION 3: SOLUTION

Eyebrow

The FrontM approach

Heading

One digital layer for ships, shore teams, crews, workflows, and partners.

FrontM brings communication, engagement, information access, workflow automation, skills development, healthcare, management, reporting, and marketplace services into one secure maritime platform.

Reach frontline consistently (visual critical updates reach the right people)

Coordinate workflows (visual teams, tasks, and vessels stay connected)

Safeguard earlier (visual Risks are spotted before they escalate)

Connect stakeholders (Visual Departments, partners, and services align)

Launch faster (Visual Apps and services deploy without silos)

Improve adoption (visual New tools become easier to use)

Measure value (visual Impact becomes visible and reportable)

Scale AI roadmap (visual Digital initiatives grow on one platform)

SECTION 4: SEGUE

Change title to Anchoring Maritime Collaboration

SECTION 5: BUY/BUILD/INTEGRATE

Eyebrow: **One platform. Three ways to create value.**

Title: **Buy. Build. Integrate. Scale.**

FrontM gives maritime companies, developers, and solution providers one practical way to accelerate digital transformation across the maritime ecosystem.

SECTION 6: WHY SUBSCRIBE

Eyebrow

Built for modern ship management

One platform for the teams running today's fleets.

Modernise how crewing, HSQE, technical, operations, welfare, and crew-facing teams work across ships and shore.

Cards

1. Crewing

Fill roles faster. Keep crews ready, cared for, and retained.

Impact: Improve crew supply, mobilisation, compliance readiness, communication, welfare access, and retention support.

CTA: Explore Platform Plans

Expanded

Keep the fleet crew-ready at every stage of the seafarer lifecycle.

Crewing teams need to source qualified seafarers, keep documents current, coordinate medicals, training, travel, sign-on/sign-off, pay queries, welfare, and crew communication — without losing time to fragmented workflows.

FrontM helps crewing teams:

Fill roles faster

Connect candidates, crew pools, vessels, and shore teams.

Keep crew ready

Support certification, PEME, training, onboarding, and joining readiness.

Reduce manual chasing

Use reminders, workflows, updates, and AI-assisted support.

Support the full journey

Communicate before joining, onboard, and after sign-off.

Improve care and retention

Make welfare, healthcare, benefits, feedback, and recognition easier to access and measure.

Prepare for MANAGE

Extend into end-to-end crew management ERP for planning, documents, mobilisation, payroll, benefits, and lifecycle operations.

Common use cases

Crew sourcing · CV pipeline support · Crew communication · Certification reminders · PEME readiness · Training updates · Onboarding · Travel coordination · Sign-on/sign-off communication · Pay and benefits queries · Healthcare access · Welfare support · Crew feedback · Retention campaigns · MANAGE crew ERP workflows

Recommended next step

Best fit: **Essential or Growth** to improve crew communication, onboarding, welfare, and engagement.

Best fit: **Scale or Tailored** for crew lifecycle workflows, integrations, AI-assisted crewing, and MANAGE readiness.

CTA: Explore Platform Plans

Secondary CTA: Book a Crewing Demo

2. Marine HR

Marine HR & Crew Experience

Build a happier, healthier, and more loyal seafaring workforce.

Impact: Improve engagement, wellbeing, benefits access, employer brand, retention, feedback, learning, and future leadership development.

Expanded

Create a crew experience that seafarers choose to return to.

Marine HR teams need to keep seafarers engaged, supported, cared for, and connected across the full employment journey — before joining, onboard, during leave, and before the next assignment.

FrontM helps Marine HR teams:

Engage crews continuously

Use campaigns, surveys, communities, recognition, and company updates.

Improve wellbeing access

Bring healthcare, welfare, mental health, benefits, and support schemes closer to crew.

Strengthen retention

Create more meaningful touchpoints across the seafarer lifecycle.

Build employer brand

Show crews they are heard, supported, developed, and valued.

Develop future leaders

Deliver microlearning, mentoring, career content, and leadership nudges.

Personalise support with AI

Use AI-guided wellbeing prompts, learning recommendations, and crew support assistants.

Measure people impact

Track engagement, feedback, service adoption, learning activity, and retention signals.

Common use cases

Crew campaigns · Pulse surveys · Wellbeing support · Healthcare access · Benefits schemes · Recognition · Employer brand · Microlearning · Career pathways · Mentoring · Crew communities · Feedback loops · Retention campaigns · AI support assistants · Personalised nudges · Service adoption tracking

Recommended next step

Best fit: **Essential or Growth** for crew engagement, wellbeing access, feedback, and service adoption.

Best fit: **Scale or Tailored** for Marine HR transformation, benefits ecosystems, AI-personalised support, leadership development, and workforce analytics.

CTA: Explore Platform Plans

Secondary CTA: Book a Marine HR Demo

3. HSQE

Collapsed

HSQE

Move from compliance activity to safety performance.

Impact: Improve safety culture, inspection readiness, incident learning, audit evidence, and AI-enabled assurance.

Expanded

Make safety, compliance, and assurance measurable across the fleet.

HSQE teams need to improve safety culture, prepare for audits and inspections, close the loop on incidents, evidence compliance, support environmental goals, and keep crews engaged in safer operations.

FrontM helps HSQE teams:

Strengthen safety culture

Keep safety visible through campaigns, feedback, learning, and participation.

Improve inspection readiness

Support internal audits, PSC, SIRE, RightShip, class, flag, and customer assurance.

Close the learning loop

Turn incidents, near misses, and lessons learned into targeted crew communication.

Evidence compliance

Track acknowledgements, quizzes, policy updates, participation, and campaign reach.

Connect departments

Align HSQE, technical, operations, vessels, and partners around findings and follow-ups.

Use AI for assurance

Support safety briefings, risk summaries, readiness checks, and corrective-action intelligence.

Common use cases

Safety campaigns · Policy acknowledgements · Incident learning · Near-miss follow-up · Audit readiness · PSC readiness · SIRE preparation · RightShip preparation · Corrective actions · Compliance quizzes · Environmental campaigns · Crew feedback · Safety culture engagement · AI-assisted assurance workflows

Recommended next step

Best fit: **Growth or Scale** for safety campaigns, acknowledgements, inspection readiness, and fleet-wide HSQE visibility.

Best fit: **Tailored** for AI-assisted assurance, corrective-action workflows, integrations, and multi-department HSQE transformation.

CTA: Explore Platform Plans

Secondary CTA: Book an HSQE Demo

4. Technical

Keep vessels reliable, available, and cost-controlled.

Impact: Improve technical coordination, maintenance visibility, defect follow-up, superintendent productivity, vendor access, and AI-assisted vessel support.

Expanded

Keep technical operations ahead of vessel risk, cost, and downtime.

Technical teams need to manage vessel condition, maintenance, defects, repairs, dry docking, spares, vendors, budgets, and performance — while keeping ships operational and commercially available.

FrontM helps technical teams:

Keep vessels operational

Connect defects, updates, service needs, and follow-ups.

Support superintendents

Give teams faster access to documents, workflows, vessel context, and AI support.

Reduce firefighting

Make issues, actions, escalations, and repeat problems visible.

Coordinate partners

Align vendors, OEMs, class, suppliers, vessels, and shore teams.

Improve dry dock readiness

Support scope, documentation, defect lists, and progress visibility.

Prepare for AI technical management

Enable troubleshooting, knowledge search, defect summaries, and predictive support.

Common use cases

Technical superintendent workflows · Vessel defects · Maintenance follow-up · PMS-linked communication · Documentation access · Troubleshooting · Dry dock preparation · Repair coordination · Spares follow-up · OEM collaboration · Class follow-up · Fleet updates · AI-assisted technical knowledge · Future MANAGE technical workflows

Recommended next step

Best fit: **Growth or Scale** for vessel support, documentation, maintenance visibility, and vendor coordination.

Best fit: **Tailored** for PMS integrations, dry dock workflows, AI-assisted technical management, fleet performance dashboards, and future MANAGE technical modules.

CTA: Explore Platform Plans

Secondary CTA: Book a Technical Demo

5. Operations

Collapsed

Keep voyages moving, visible, and commercially controlled.

Impact: Improve voyage execution, port coordination, ETA visibility, charterer communication, incident response, partner alignment, and AI-assisted decisions.

Expanded

Make voyage execution connected, visible, and AI-ready.

Operations teams manage vessel movements, ETAs, port calls, cargo readiness, charterer updates, agent coordination, vessel performance, incidents, documentation, and commercial follow-up.

FrontM helps operations teams:

Coordinate voyages

Connect movements, ETAs, instructions, and schedules.

Improve port readiness

Align vessels, agents, terminals, cargo, and shore teams.

Support charterers

Coordinate instructions, updates, delays, and claims support.

Monitor performance

Track speed, consumption, off-hire, delays, and exceptions.

Respond faster

Create a shared layer for first operational response.

Use AI for execution

Generate voyage summaries, readiness checks, alerts, and decision support.

Common use cases

Vessel movements · ETA updates · Port calls · Agent coordination · Berthing · Cargo readiness · Voyage instructions · Charterer updates · Speed and consumption · Off-hire · Delays · Incident response · Port documents · Voyage reports · Claims support · AI-assisted voyage summaries · Future MANAGE operations workflows

Recommended next step

Best fit: **Scale** for fleet-wide operational coordination, port-call visibility, performance updates, and partner alignment.

Best fit: **Tailored** for voyage execution workflows, charterer interfaces, port and agent integrations, AI-assisted operations, and future MANAGE operations modules.

CTA: Explore Platform Plans

Secondary CTA: Book an Operations Demo

6. Digital Leaders

Collapsed

Turn digital ambition into governed fleet-wide adoption.

Impact: Reduce vendor sprawl, improve adoption, govern AI, connect systems, and prove value across ships and shore.

Expanded

Move from fragmented digital projects to one scalable operating model.

Digital leaders need to modernise safety-critical, low-connectivity fleet environments without increasing cyber risk, vendor sprawl, integration debt, or crew workload.

FrontM helps digital leaders:

Reduce vendor sprawl

Give approved apps and partners one controlled route to the fleet.

Improve adoption

Create one consistent experience across ship, shore, crew, and departments.

Connect systems

Bring workflows, services, APIs, data, and reporting into one layer.

Govern AI

Enable AI-assisted workflows with human oversight and clear controls.

Simplify deployment

Support role-based, bandwidth-aware maritime environments.

Prove value

Measure rollout, usage, engagement, compliance, and service adoption.

Scale transformation

Turn pilots into a repeatable digital operating model.

Common use cases

Digital roadmap · Fleet rollout · Vendor consolidation · Marketplace governance · AI workflows · AI governance · System integration · Role-based access · Low-bandwidth deployment · Adoption tracking · Cyber-aware rollout · Impact reporting · Executive dashboards

Recommended next step

Best fit: **Scale** for fleet-wide adoption, workflow standardisation, reporting, and partner-service rollout.

Best fit: **Tailored** for enterprise architecture, AI governance, deep integrations, cyber controls, and ecosystem-scale transformation.

CTA: Explore Platform Plans

Secondary CTA: Book a Digital Transformation Demo

Seque

Technical keeps vessels ready. Operations keeps voyages moving. HSQE keeps assurance measurable. Crewing and Marine HR keep people ready, supported, and retained. Digital leaders make it all scalable, secure, and AI-ready.

FrontM connects every function through one intelligent ship-shore operating layer.

SECTION 7: IMPACT

Eyebrow

Measure what matters

Headline

Turn adoption into measurable operating value.

Intro Copy

FrontM helps maritime companies understand what is reaching the fleet, what is being used, where workflows are moving, and where digital transformation is creating value.

Because the business case for transformation starts with adoption, visibility, and evidence.

Proof Row

Operating at maritime scale

1,500+

Vessels reached

100K+

Maritime professionals connected

50+

Maritime operators

30+

Partner apps in the marketplace

Supporting Line

FrontM is already supporting ship-shore communication, workforce engagement, welfare, learning, healthcare, operations, and partner-service delivery across the maritime ecosystem.

Impact Cards

Card 1

Reach & response

Measure who received, acknowledged, and acted on critical updates.

Card 2

Safety & assurance

Evidence campaign participation, policy acknowledgement, audits, and inspection readiness.

Card 3

Health & welfare

Track healthcare access, welfare usage, support cases, and wellbeing engagement.

Card 4

Learning & competence

Measure crew education, microlearning, assessments, and development participation.

Card 5

Operational efficiency

Track manual work reduced, workflows completed, cases closed, and delays avoided.

Card 6

Digitalisation accelerated

Reduce partner scouting, integration effort, rollout time, and change-management friction.

Card 7

AI readiness

Create data harmony, workflow intelligence, BI visibility, and AI-assisted decision support.

Card 8

Commercial confidence

Strengthen customer assurance, ESG evidence, contract support, and partner-service value.

Value Bridge

From platform usage to business case evidence.

FrontM helps maritime companies connect adoption data to the outcomes that matter most.

Time saved

Less chasing, reporting, manual coordination, vendor scouting, repeated rollout effort, and duplicate communication.

Risk reduced

Better visibility into safety participation, welfare access, health support, escalation readiness, and inspection evidence.

Value captured

Higher adoption of healthcare, welfare, learning, benefits, partner services, and existing digital investments.

Cases resolved

Support cases, welfare requests, healthcare interactions, operational issues, and workflow actions tracked through to closure.

People supported

Crew reached, educated, engaged, assisted, recognised, and cared for across the seafarer journey.

Digitalisation accelerated

Faster discovery, integration, deployment, and adoption of maritime services through one operating platform and marketplace.

AI readiness created

Data, workflows, adoption signals, and BI reporting become structured enough to support AI-assisted operations.

Commercial confidence strengthened

Evidence for customers, charterers, audits, inspections, ESG reporting, and contract assurance.

CTA Block

Build the business case for your fleet.

See how FrontM can help your organisation reduce operational friction, accelerate digitalisation, improve workforce outcomes, and create the data foundation for AI-ready maritime operations.

Primary CTA

Secondary CTA

Book a Value Assessment

Microcopy

Actual value depends on fleet size, workflows, service mix, adoption levels, partner ecosystem, and operating model.

SECTION 8: PLATFORM ARCHITECTURE

Section Eyebrow

[frontm.ai](#)

Section Headline

Build once. Deploy across maritime.

Section Intro

frontm.ai is the purpose-built developer environment for maritime AI applications, integrations, workflows, and ship-shore deployment.

Use it to create apps, agents, automations, and services that can run across the FrontM ecosystem — from ships and shore teams to crews, partners, and the FrontM Exchange.

CTA

Build on frontm.ai

Architecture Header

One platform to build, run, and scale maritime AI.

Architecture Intro

FrontM connects the full maritime innovation cycle: build with Studio, deploy through Fabric, and distribute products, services, and apps through Exchange.

Architecture Labels (edit inside the picture which is otherwise nice)

FrontM Exchange

Marketplace layer

Products, services, apps.

FrontM Studio

Builder layer

Apps, agents, workflows.

FrontM Fabric

Foundation layer

Runtime, data, integration.

Supporting Line Below Visual

Exchange brings together the products, services, and apps built on frontm.ai — giving maritime companies one place to discover, adopt, and scale digital solutions.

CTA Row

Build on frontm.ai

Join the Marketplace

Maritime does not need another isolated app. It needs a way to build, integrate, deploy, and scale AI-ready solutions across the whole operating environment.

That is what frontm.ai enables.
